

## VIZVOX: THE PLATINUM STANDARD IN VIDEO VISITATION

VizVox is the technology of choice for correctional institutions seeking the benefits of remote visitation and for criminal courts seeking to improve the efficiency of legal processes through remote arraignment and collaboration.

Through leading IP-based technology and unique control and scheduling software, VizVox solutions increase efficiency, improve security, reduce costs and ease remote collaboration.

VizVox is comprised of a robust portfolio of products that eliminate visitor management and inmate movement, and reduce the need for dedicated security personnel. Customized modules and industry-leading software facilitate:

- Video visitation
- Collaboration with courts

### **Beyond penitentiaries: Use VizVox to increase efficiency and security.**

Most notably used by penitentiaries as a critical tool in the elimination of contraband and narcotic infiltration, VizVox is built on unique innovations previously unseen in the video-visitation industry. Customizable applications allow for:

- Efficient court cooperation
- Accelerated legal processes
- Increased efficiency and security
- Reduced visitor-management-related cost

In addition, VizVox includes optional software that enables secure video arraignments and remote court appearances. The modules can transmit real-time, full-motion video and audio of inmates to courtrooms, send and receive essential court documents and digitally archive video visitation and court-related activity.

## A strategic cost-management solution.

By maintaining inmate isolation and providing institutions with the finest personal and professional support in the industry, VizVox solutions prove to be essential in increasing return-on-investment rates. Proven cost reductions include those associated with:

- Inmate transfer
- Court appearances
- Visitor centers
- Cross-jurisdictional connectivity
- New facility construction

## The VizVox advantage.

Each VizVox module and application is supported by a commitment to service and accessibility; the team of trained implementation and delivery experts behind the technology is an interminable partner in the achievement of clients' strategic business goals.

A comprehensive portfolio of products and services—backed by unmatched levels of support—is what propels VizVox into position as the preferred technology-conferencing solution for government bodies and penitentiaries.

## Unmatched efficiency and security.

VizVox systems are the only Internet protocol units incorporating applications for Web-centric control and scheduling management. No other video visitation product line can offer the breadth of services contained in the software, and no other provider can produce such high levels of client satisfaction.

## Supported by a leader in service and technology.

Developed and supported by M2 Technology, a preferred information-technology solution provider, VizVox is backed by credible engineers and technologists with first-hand knowledge of how to leverage technology for increased security and premium operational efficiency.

For enterprise-level clients in government, defense, and commerce, M2 Technology is the vendor that provides uncommon levels of service, integrity, responsiveness, loyalty, reliability, trust and expertise.
